# Add Wireless Extensions...

## TO YOUR XEN IPK BUSINESS TELEPHONE SYSTEM

The integrated DECT option provides the benefits and flexibility of wireless extensions to new IPK users. In addition, the fully modular in-skin DECT solution is able to grow in line with a business's changing needs.

### IN ANY WORK ENVIRONMENT

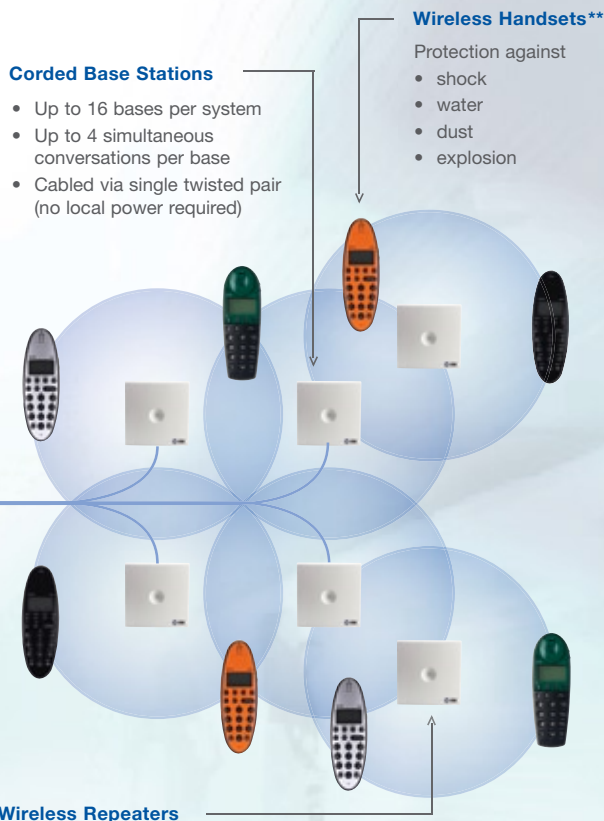

The range of wireless handsets includes models designed to withstand the harshest work environments, with resistance to shock, water and dust. An intrinsically safe handset is even available for areas at risk of explosion.

### NEC and KIRK DECT

The in-skin DECT solution for the Xen IPK is a joint development between NEC and KIRK Telecom AS, one of Europe's leading suppliers of DECT solutions for business telephone systems. Designed specifically to carry wireless voice, DECT provides users with:

- Consistently high levels of voice quality
- Uninterrupted calls even when moving between base stations
- Dedicated radio frequencies to avoid interference
- Equipment based on international standards
- Secure conversations with full encryption

To find out more about DECT for the Xen IPK, contact us on 1800 036 136 or contact your Authorised NEC Channel Partner
